## What is a Touch-Sensitive Lamp?

A Touch-Sensitive lamp is one that is activated by human touch rather than a flip, push-button, or other mechanical switch. These lamps are popular as desk lamps and nightstand lamps where you can turn it on in the pitch dark without looking for a switch. They act on the principle of body capacitance. Body capacitance is the physical property of the human body that has it act as a capacitor. Like any other electrically-conductive object, a human body can store electric charge if insulated. The actual amount of capacitance varies with the surroundings; it would be low when standing on top of a pole with nothing nearby, but high when leaning against an insulated, but grounded large metal surface, such as a metal wall in a factory.

**SECRET TOUCH LAMP**

During the winter, especially in a heated house, due to a very dry environment and carpeting environment, the electric charge could be built up quite easily and triggered the oscillator inside the lamp when the metallic plate is touched. Touch-sensitive lamp switches may be dimmable, allowing the brightness of the lamp to be adjusted by multiple touches. These lamps contain an oscillator inside the control module that changes frequency when the metallic plate is touched.

A key patent was published in 1954 and commercial models became available by at least 1955. However, due to electrical circuits of the time having low electrical efficiency as they were vacuum tube-based, and the high price of the product, the concept was not popularized until the 1980s. The later versions of the mechanism used integrated circuits and transistors like ours as opposed to the 1954 "Aladdin Lamps" patent. Our control module has been fine tuned 4 times in order to accommodate our North American electrical standard. It is part of our trade secret how we can make our products so stable.

## Serious Legal Issues

What kind of certifications do Consumer Electronics need to pass in order to sell legally to the public?

Every day, more and more consumers recognize the importance of the certification on products they purchase as a symbol of safety. Are you willing to sacrifice this safety net and purchase something out there that's cheaper in price but that might burn down one of your customer's house?

The ETL Listed Mark is a proof that our product has been independently tested and meets the applicable published standard. The ETL Mark proves our product is compliance to North American safety standards. Authorities Having Jurisdiction (AHJs) and code officials across the US and Canada accept the ETL Listed Mark as proof of product compliance to published industry standards. ETL is an OSHA (Occupational Safety & Health Administration) recognized NRTL (Nationally Recognized Testing Laboratory) and is accredited as a Testing Organization and Certification Body by the Standards Council of Canada.

All you need is one single lawsuit that might leads to shut down of your business. Remember, the person who distribute the illegal products also subject to penalty by the provincial Electrical Authorities.

August 2023

## BUSINESS PLAN

*Blueprint for Success*

### EXECUTIVE SUMMARY

Ace Annison Ltd. is a Toronto/Ontario based wholesale giftware company who has built a reputable tableware/giftware business in Canada for the past 25 years. ACE Annison Ltd. started back in 1994 to source and distribute unique eye-catching giftware. The gifts that this company sells are branded with its logo and bottom stamp. Just like many successful companies, its aim is to create a customer experience so powerful that their customers will recommend Ace to other clients and friends. Ace has worked hard to bring great colourful gifts and great prices to restaurants, premium gift stores, museums, boutiques, and specialty shops. The company's focus is to use passion in identifying their client's wishes and work to achieve these in partnership with them.

### MISSION STATEMENT

The company is dedicated to ensure a friendly sales environment in which its customers can enjoy all the benefits of a great gift at great price. In order to get the best possible price, everything they purchase comes directly from the factory, using a permanent buyer who lives close to the origin. (No middleman involvement). Unlike many other wholesale giftware companies that are concerned with turning profit, the primary objective at Ace Annison is to exceed all customers' expectations by delivering exceptional products and caring services at a great price. As the chief executive at American Express puts it, "Promise only what you can deliver and deliver more than what you promised!" At Ace, they believe customer satisfaction will determine both the success and longevity of their company. Their cliché - "We accept no substitutes for Great Stuff & Great Price."

### KEYS TO SUCCESS

- 1. Satisfied and Loyal Customers** – Satisfied customers who remain loyal, repeat purchase, and refer other customers. This is the result of developing a superior and efficient delivery process through knowledgeable and productive service employees. It is 10 times easier and cost effective to keep existing customers than acquiring new ones. We continuously value our after sale services.
- 2. Satisfied and Productive Service Employees who treat every customers with respect.**
- 3. Small can be Beautiful** – Through smart segmentation, Ace believes small players can compete effectively against industry giants by understanding the value of our unique product mix. In addition to recognizing that shopping is a highly pleasurable experience. We are a needs driven company. We build our business based on what our customer wants and not based on getting the cheapest price on the product category in the market. What's the point of buying cheap and not being able to sell?

## PLEASE TOUCH ME

### The Beauty of Touch Sensor Lamps

#### Multiple Functionality:

- Stylish, Modern, Functional and Affordable.
- This item can be used as a Night Light / Table Lamp / Freshener / Warmer.
- Four levels of touch sensor variable lighting options to choose from (Low/Mid/High/OFF).
- Most people use it during the complete darkness without the need of looking for a switch.

#### Added Values:

- An optional scented oil/wax glass container that can be used to create your desired atmosphere.

#### Safety Issues:

- ETL Listed Mark: The ETL Listed Mark is a proof that our product has been independently tested, certified, and meets the applicable published standard in Canada and US.
- Lifetime Warranty to our direct Ace customers; 2 years to the public customers.
- We stand behind all of our products and are very serious about our aftersale services.

#### Total Sales Blow Out:

- The average sales volume for this product line has been doubled year over year since started.

# Ace Annison Ltd.

## IT MOVES JUST BY HEAT

### The Beauty of Carousel Light

*Patented Design - The First of Its Kind, Stylish, Modern, and Functional.  
Move by the HEAT that generated from the light bulb itself.  
Touch Sensor Lamp - Easily to turn on/off in the darkness without a switch.  
Most important, it's NEW, unique, and no one else in the Market has it yet!*

# Touch Lamps Accessories - Locally Made Scented Wax

(All Scented Waxes are made locally in Bellville, Ontario, Canada - Let's Buy Local)

Item #: \* BR-XXX

Price: \$ 4.99/Unit

Consignment/Local Supplier/Non-Discountable

We carry over 40 scents. They are locally made, 100% soy wax, in Belle River, Ontario. Please visit our website for more products information.

“White Frosting”

Soy candle frosting is normal. You may notice some variations in the colour of soy candles, especially candles that use 100% soy wax with no other additives. This is called “frosting.” 100% soy wax candles also tend to frost over time, but this in no way affects how the candle burns.

## Pottery & Porcelain

*The Oldest Arts in The World*

### Pottery / 低温瓷:

Pottery can be classified as either A) Earthenware or B) Stoneware depends on the temperature applied.

A) Pottery / 低温瓷 --> 1) Earthenware (soft clay; around 750 - 1,100 degree C°): The body is hard but remains porous. Clay is generally thought to be the primary material from which pottery and porcelain is made. Other material can include feldspar, ball clay, glass, bone ash, quartz, alabaster, etc. Most of our flower pots and piggy banks are made of Earthenware.

B) Pottery / 低温瓷 --> 2) Stoneware (around 1,500 degree C°): The body is hard and vitrifies. ie. Japanese Bowls

### Porcelain / 高温瓷:

"Fine & compact pottery." Translucent – a strong light shining near the plate can be seen through it. Porcelain is occasionally referred to as "China" in some English speaking countries because until the 17th century, China was the sole producer of porcelain. Porcelain derives its present name from old Italian Porcellana because of its resemblance to the translucent surface of the shell. The term, porcelain, lacks a universal definition and has been applied in a very unsystematic fashion to substances of diverse kinds which have only certain surface-qualities in common.

- A ceramic material made by heating raw materials in a kiln to temperature between 1,200 degree C° & 1,500 degree C°. It can be divided into the three main categories: 1) Hard Paste, 2) Soft Paste, 3) Bone 骨瓷. The type of categories that our product is in depending on the composition of the paste and the material used to form the body of a porcelain object. ie. Hard Paste is produced with a paste composed of kaolinite, quartz, and alabaster and fired at temperatures in excess of 1,350 degree C° to produce porcelain of great hardness and strength. Soft Paste is produced by using mixtures of China clay and ground-up glass.

- Bone China --> Bone Ashes (normally use pig's bone) Our Tiffany Pocky Dots Teaset Collection are made from it.

- Fine Bone China/New Bone China -->

Magnesium Content (normally around 40% content)

### Glazing:

Porcelain wares are glazed for decorative purposes and to make them resistant to dirt and staining.

- Over glaze decoration is using a full range of coloured enamels painted on the object after the glaze has been fired. The decoration is then fixed to the glaze by another firing at a relatively low temperature.
- It may be decorated under the glaze using pigments that include cobalt (blue), and copper (red). Underglaze decoration only allows few colours such as cobalt blue and copper reds. Most modern Underglaze decorated chinaware is decorated by the transfer print process. In this, coloured tissue paper prints are applied to the unglazed ware. When the coloured tissues are soaked off, the design remains.

# Ace Annison Ltd.

*Every day, more and more consumers recognize the importance of the certification on products they purchase as a symbol of safety. Are you willing to sacrifice this safety net and purchase something out there that's cheaper in price but that might burn down one of your customer's house?*

*The ETL Listed Mark is a proof that our product has been independently tested and meets the applicable published standard. The ETL Mark proves our product is compliance to North American safety standards. Authorities Having Jurisdiction (AHJs) and code officials across the US and Canada accept the ETL Listed Mark as proof of product compliance to published industry standards. ETL is an OSHA (Occupational Safety & Health Administration) recognized NRTL (Nationally Recognized Testing Laboratory) and is accredited as a Testing Organization and Certification Body by the Standards Council of Canada.*

*All you need is one single lawsuit leads to shut down your business. Remember, the person who distribute the illegal products also subject to penalty by the provincial Electrical Inspections.*

## Serious Legal Issues

What kind of certifications do  
Consumer Electronics need to pass  
in order to sell legally to the public?

Conforms to UL / ANSI Standard 153  
Certified to CAN / CSA Standard C22.2 No 250.4

# About Our Touch Sensor Lamps

## Ace Gift Collection Touch Sensitive Lamp

### Product Description:

- Stylish, Modern, Functional, and Affordable.
- This item can be used as a Night Light / Table Lamp / Freshener / Warmer / Bedside Lamp.
- Four levels of touch sensor variable lighting options to choose from (low light/mid light/brightest/off).
- An optional scented oil/wax glass container that can be used to create your desired atmosphere. This is not a humidifier.
- ETL Listed: The ETL Listed Mark is a proof that our product has been independently tested and meets the applicable published standard. Our products are in compliance with North American safety standards. It is officially recognized by OSHA as a Nationally Recognized Testing Laboratory (NRTL) in the US, and accredited by the Standards Council of Canada (SCC).

### Operating Instruction:

- Connect the adapter input port to an electrical plug.
- Place on a flat surface and touch the aluminum part of the base on the product to adjust the lighting intensity. Over time, the buildup of electric static may trigger the sensor to turn on/off by itself. This is normal based on the weather or humidity. Just unplug it to reset build up of static.
- Do not hold onto any part of the aluminum surface while trying to change the lighting intensity. You have to release your hand and place the item on the table, flat surface area, before you can make any changes. For any painted unit (Black/White), it will be less sensitive compared to a silver unit.
- Please remove any liquid contents from the glass container before you move the lamp. The liquid might drip down inside the light fixture and cause dangerous operation.

### Product Information:

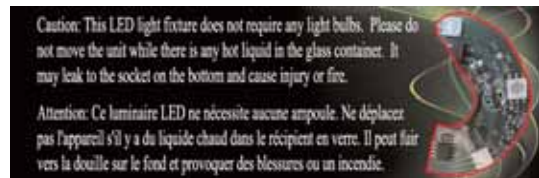

- Power Input: 120V  $\pm$ 5%
- Bulb: G9 120 V / 25 Watts Halogen Bulb. Features a Clear Shielded Capsule Unit (One Free Unit Inside).
- ETL Listed (Both in US and Canada): Certified Number (5005050)

## Moving Carousel Lamp

Please ensure the fan blades are flipping upward at 45 degree in order to maximize the spinning action. The higher the degree, > 45 degree, the less the resistance/spinning.

## Important Safety Instructions Standard Touch Sensitive Lamp

### Warning – To reduce the risk of Fire, Electric Shock, or Injury:

1. Indoor use only.
2. Please turn off the power if you do not plan to use for a long period of time. It may get very hot.
3. Do not turn on the brightest power for more than 6 hours continuously.
4. Not suitable for children under 6 years old.
5. Risk of fire / Injury to persons. Keep away from combustibles or materials that may burn.
6. It is not a toy or permanent home lighting furniture.
7. Use 25W Maximum (or Lower Watts like 20W), Type G9 Halogen Bulb. Turn off, unplug, and allow it to cool before replacing Type G9 25W Halogen Bulb. Do not touch the lamp or glass container holder when it is hot. Wait until it cools down.
8. Bulb gets HOT quickly, as well as its surroundings! Do not touch the light bulb or the lamp containment barrier after the light is on.
9. Do not look directly at the light bulb.
10. Please remove any liquid content from the glass container before you move the lamp. It might drip down inside the light fixture.
11. This portable touch sensor lamp has a polarized plug (one blade is wider than the other) as a feature to reduce the risk of electric shock. This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not alter the plug.
12. Please do not be surprised to learn that the unit may not be able to operate properly due to unstable voltage in your current electrical outlet. Sometimes, when you plug in too many devices on the same outlet, it may drop the voltage below 110-120 volts. It may indirectly interfere with the sensor unit on the control chip. In this case, please try at another new location away from the current electrical outlet that has a problem in order to further identify the issue with the faulty unit.
13. When substituting any type of energy-efficient LED light bulb, it may indirectly interfere the proper operation of the lamp (it might not be able to trigger the sensor to turn On/Off the lamp). Please test the unit with the original light bulb before use.
14. Instruction on “How to replace your light bulb” at YouTube: <https://youtu.be/GnVWIG1v5k8>  
This only applies to all the circle/round touch sensor lamps. The cap from the oval-style lamp cannot be removed. You need to use tools such as long-nose pliers to remove the light bulb.
15. Learn more about our patented Carousel Moving Lamps: <https://youtu.be/HiTfo4D1Jfg>

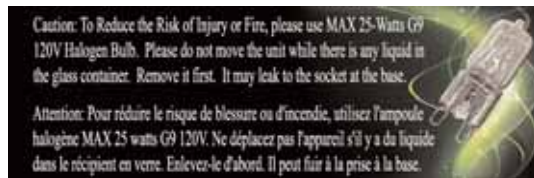

### Warranty Information:

- One year from the date of purchase with proof of receipt.

Conforms to UL / ANSI Standard 153  
Certified to CAN / CSA Standard C22.2 No 250.4

## Payment Policy

- We allow our valued customers to make their payment by credit card without any surcharges when placing their order with Ace Annison Ltd.
- This credit card payment option cannot be combined with any other payment option. If you choose and qualify for a net 30 days credit term with us, we can only accept cheque or cash payment after the term has expired. The credit card payment option cannot be combined with the net 30 days term agreement. After agreeing to our set terms, a 3% surcharge will apply if you insist later to make payments by credit card. The 7 - 30 days post dated cheques must be mailed out immediately upon receiving of the shipment.
- A late payment fee of 2% will be in effect after the expiration of payment due dates. The date is determined by the courier date stamp at time of mailing your cheques to Ace Annison Ltd. Please refer to your invoice's terms and conditions.
- Any Non-Sufficient Fund (NSF) cheques will incur a \$10 administration fee and customer will be responsible for any cost associated from the banking service charge (normally \$42.50).

Thank you for your understanding.

## Credit Note / Return Policy

### Getting Started:

- Please double check all the incoming items by its quantity and quality.
- Mark any broken items on the invoice. All claims, if applicable, can only be made once, **collectively**, on each invoice. It has to be made **within 10 days**.
- You will be required to **take a picture** of all the damaged items **if asked**.
- Place all the damaged items in a box.
- E-mail your report to [AceCanada@AceAnnison.com](mailto:AceCanada@AceAnnison.com) or fax to us with detailed description of the problem. We will contact you for pickup of the damaged items by phone upon receiving your e-mail or fax. It will take approximately 7 business days to process your request as we need to pull out the packing list record & check our warehouse camera to ensure honesty and integrity.
- We can only refund to your credit card if the purchase was made by credit card payment option & if this is your last business dealing with us. Otherwise, **all claims can only be issued as a credit note** to your account towards your next purchase.
- We understand that not all businesses can visit the trade show every ½ year. Hence, we allow all credit notes to expire after 1.5 year instead of one year from the date of issuance.
- Please work together with us to minimize our combined loss – we don't mind occasionally taking a loss - but not all the time. In extreme cases, we rather choose not to conduct any more business with companies who are dishonest, or express unreasonable claims.

### Shipping your Damaged Items back:

We will provide you with our local or nearest Collection Centre's shipping address for you upon receiving your Damage Report email. We will pay for the return freight cost. If applicable, we will arrange our regional sales staff to visit your store to examine the damaged items. All unreasonable claims will be monitored throughout the year.

Thank you for your cooperation.

[illegible]

Claims for shortages and damages must be reported collectively within 10 days upon receiving of goods. Only credit note will be issued for future purchase if deemed reasonable. No refund to credit card unless account is to be closed.

Any items remain in the back order will be shipped ASAP without second consent UNLESS cancelled.

A credit card payment option only allowed WITHOUT a net 30 days\* term approved account. If we grant you a net 30 days term, we EXPECT a post dated cheque mailed out in advance as soon as you have received and checked your incoming shipment. Otherwise, a 3% extra charge will be applied if you later on insist to pay by credit card again after your 30 days term is over.

Do not cancel merchandise without a good explanation and our consent once you have placed an order and signed on this order form. A 25% restocking fee will be applied once your order has been processed.
